SUMMARY

- **Frontend developer** with **4 years of experience** specializing in **user experience (UX)** for telecoms, AEC SaaS and logistics domains.
- Skilled in modern front-end frameworks with expertise in **full-stack** development. Strong ability to deliver scalable solutions through end-to-end development and technical optimization.
- Skilled in collaborating with cross-functional teams to deliver high-quality software solutions.
- Proficient in web optimization and security, techniques, adhering to best practices and principles.
- Knowledge of server-side languages like Node.js for developing robust backend services.
- Experienced in designing and implementing **RESTful APIs** with an emphasis on security, scalability, and performance.
- Experience of working independently and mentoring a team.
- Active participant in scrum ceremonies, evaluating dependencies, effort estimation, and task delegation.

SKILLS

Frontend : React.js,Redux, Redux-toolkit, Redux Saga, Webpack, Babel, HTML, CSS, styled-components, Material UI, DOM Manipulation, Browser APIs, JavaScript (ES6/ES7), React Testing Library, Jest, Web page optimization, Lighthouse.
Backend : Node.js, Express.js, MongoDB, Redis, REST APIs development & integration.
Concepts : Data Structure, Algorithms.
Other : GitHub, AWS, Docker, Teamwork, Communications, Leadership.

EXPERIENCE

Xpressbees (BusyBees Logistics Solutions)
Software Development Engineer

Feb 2024 – Present
Pune, Maharashtra

Drove operational enhancements in a leading e-commerce logistics firm, optimizing supply chain processes to reduce shipping delays by three days on average while increasing overall service reliability for clients.

- Built scalable React dashboards used across **100+ logistics centers** for operations management
- Led the development of the Eagle Portal, a logistics web application managing B2B and B2C deliveries.
- Delivered the Onboarding Portal UI for a logistics web application to onboard clients and partners, streamlining registration and activation workflows.
- Developed xbrcl, an internal UI kit using Material UI and React JS, improving productivity by 30-40%.
- Collaborated on API development for the WMS, leading to a 5% improvement in shipment tracking accuracy.

Asite Solutions Pvt. Ltd.
UI Developer

Aug 2022 – Jan 2024
Ahmedabad, Gujarat

Asite is a cloud-based software technology company specializing in collaborative project and information management for the Architecture, Engineering & Construction (AEC) and built environment industries.

- Developed Common Data Environment platform using **React.js** and **TypeScript**
- Created **30+ reusable components** reducing development effort by **35%**
- Improved application load time by **40%** through frontend performance optimizations
- Increased unit test coverage from **60% to 85%** using Jest

Kantar
Software Development Engineer

Feb 2022 – Aug 2022
Bangalore, Karnataka

Kantar is a leading global marketing data, insights, analytics, and consulting firm

- Built responsive React interfaces for analytics tools used by **200+ global users**
- Improved navigation flow and usability, reducing bounce rate by **15%**

Affinity Steps   Feb 2021 – Sep 2021
Software Engineer Intern   Udaipur, Rajasthan

- Developed dynamic UI components using React.js for multiple client web applications

EDUCATION

M.L.V Textile & Engineering College   2017 – 2021
Bachelor of Technology   Bhilwara, Rajasthan
