Summary

Software Development Engineer with **4.6+ years of experience** building scalable, high-performance web applications using **React.js, JavaScript (ES6/ES7), TypeScript, Redux**, and **REST APIs**, with hands-on experience in backend development (**Node.js, Express.js**) and cloud deployment (**AWS**). Proven track record delivering enterprise-grade UIs, operational dashboards, and customer onboarding platforms serving **40,000+ daily users, 4,000+ logistics centers**, and **1.4M+ daily transactions**. Skilled in **Component-Based Architecture, Responsive Web Design, State Management, API Integration, Performance Optimization**, and **Unit Testing (Jest, React Testing Library)**. Experienced in **Agile/Scrum** delivery, **CI/CD** pipelines, and cross-functional collaboration with global, distributed teams to ship reliable, user-centric products.

Technical Skills

Languages & Frontend: JavaScript (ES6/ES7), **TypeScript, React.js, Redux**, Redux Toolkit, Redux Saga, Context API, HTML5, CSS3, Responsive Web Design, Webpack, Babel, Styled-Components, Material UI, DOM Manipulation, Browser APIs

Backend & Cloud: **Node.js, Express.js**, REST API Development, **AWS** (Amazon Web Services), Microservices Integration, **JWT** Authentication, Authorization, Swagger Documentation

Database: **PostgreSQL, MongoDB**, JSON

Testing & Quality: **Jest**, React Testing Library, Unit Testing, Debugging, Code Review

Tools & Practices: Git, GitHub, Jenkins, **CI/CD**, Jira, **Agile, Scrum**, Software Development Life Cycle (SDLC), Performance Optimization, Cross-Browser Compatibility

Also Familiar With: **Docker, Redis, Next.js**, React Query (TanStack Query), **OAuth 2.0, RBAC**, API Security, Swagger/OpenAPI

Professional Experience

Xpressbees (BusyBees Logistics Solutions)

Software Development Engineer-1

Feb 2024 - Present
Pune, Maharashtra, India

- Developed and maintained enterprise logistics frontend applications using **React.js, TypeScript, Redux**, and **REST APIs**, supporting shipment operations across **4,000+ logistics centers** nationwide.
- Designed and delivered an **AWB Tracking UI** supporting **1,000+ real-time tracking requests** and **50,000+ bulk shipment tracking operations** in a single workflow, improving operational visibility.
- Implemented **Shipping Label Generation** and **Bulk Label Generation** modules using **React.js** and REST API integration, reducing manual shipment processing effort by **60%**.
- Developed **Digital POD (Proof of Delivery)** reporting interfaces enabling operational teams to access and download delivery reports for **1.4M+ daily shipments**.
- Built **Freight Calculator** functionality for B2B wallet customers, automating shipping cost calculations and improving quotation accuracy by **90%**.
- Developed a **Self-Onboarding platform** UI with GST verification, OTP authentication, and automated company profile creation, reducing onboarding time by **70%**.
- Implemented an **SLA Dashboard** with Incoming, Outgoing, OFP, and OFD monitoring modules, enabling operations teams to track shipment performance across **4,000+ centers** in real time.
- Built **Forward Pickup** and **Reverse Pickup** workflows for **Android WebView** applications used by **40,000+ delivery associates**.
- Worked closely with backend and DevOps teams on API design and integration, aligning frontend workflows with **Node.js/Express.js** services and **AWS**-hosted deployments for mission-critical logistics systems processing **~1.4 million shipments daily**.

- Resolved **100+ production issues** and enhancement requests through debugging and root-cause analysis, improving platform stability and reducing operational escalations.

Asite Solutions Pvt. Ltd.

Software Development Engineer

Aug 2022 - Jan 2024
Ahmedabad, Gujarat, India

- Developed enterprise **SaaS** frontend applications using **React.js** and **TypeScript** for global Architecture, Engineering, and Construction (AEC) clients.
- Built and maintained **Common Data Environment (CDE)** UI modules supporting real-time collaboration among **10,000+ project stakeholders**.
- Developed **30+ reusable React.js components** and shared UI component libraries, reducing development effort by **35%**.
- Optimized frontend performance through lazy loading, memoization, and code splitting, reducing application load time by **40%**.
- Integrated and consumed **100+ REST APIs** across project management, document management, and workflow modules.
- Participated in **Agile/Scrum** delivery cycles with sprint-based releases, maintaining a **95%+ sprint completion rate**.

Kantar

Software Development Engineer

Feb 2022 – Aug 2022
Bangalore, Karnataka, India

- Developed analytics and reporting frontend applications using **React.js** for market research operations.
- Built interactive dashboards and reporting modules used by **2,000+ business users** across multiple countries.
- Integrated **REST APIs** for survey analytics, reporting, and business intelligence workflows.
- Improved report generation performance by **30%** through frontend rendering optimizations.

Affinity Steps

Software Engineer Intern

Feb 2021 - Jan 2022
Udaipur, Rajasthan, India

- Developed CRUD-based business applications using **React.js** and **REST APIs**.
- Collaborated with a team of developers in **Agile** environments, contributing to feature delivery and bug fixes.
- Implemented reusable UI components, improving development productivity and code maintainability.

Projects

HRMS Application (Personal Project) | *React.js, Node.js, Express.js, REST API*

- Developed a full-stack **Human Resource Management System (HRMS)** with employee management, attendance tracking, leave management, payroll, and **role-based access control (RBAC)**.
- Built the **React.js** frontend and designed and implemented **REST APIs** using **Node.js** and **Express.js**, including Express middleware for request handling, validation, and centralized error handling.
- Implemented secure authentication using **bcrypt** password hashing and **JWT**-based authentication with **refresh tokens** for session management.
- Built file upload handling, **pagination**, and search/filtering functionality for employee and payroll records to support large datasets.
- Designed the application's **database schema** and implemented the data access layer using **ORM/ODM** tooling, along with request **logging** for debugging and traceability.
- Implemented workflow approvals and **role-based access control (RBAC)** across both frontend and backend, and **deployed** the application to a cloud hosting platform (e.g., Render/Railway) for live access.

Education

M.L.V Textile & Engineering College

Bachelor of Technology

2017 - 2021
Bhilwara, Rajasthan
